About

Senior Product Designer at Genea, leading the evolution of enterprise access control experiences. With a strong foundation in UX and interface design, I craft seamless digital products that solve real-world problems at scale. At Genea, I've played a key role in redesigning critical security tools, establishing a scalable design system, and aligning cross-functional teams toward user-centered innovation. I also mentor junior designers and contribute to shaping the design culture within a fast-paced SaaS environment.
